

## Technical Information

### Model: Super Luxe

#### Unlimited and Customized Glass Designs.

- Double Flat Panel Radiator.
- Unbeatable heat output.
- A++ Energy saving Grade. "More Heat- Less cost"
- Made from 99.97% Pure Aluminum.
- High Surface area due to "Micro Fin Technology"
- "Low Temperature Technology" Heat up quickly and efficiently even at low water flow and low water temperature.
- Compatible with thermostatic valves, central heating, heat pumps and solar panel heat supplies.
- No- Corrosion Technology.
- Resistance to excess pressure up to 50 Bars.
- Light weight and easy to install.
- Equipped with height adjustable brackets.
- Tested and Certified to BS EN 442 Standards.
- CE Marked
- 10 Years Guarantee.
- Pipe Centers are the width of the radiator plus the valves.
- Distance from Wall to Centre: 60 mm.

#### Stocked Finishes and Sizes:

White Panel at the back of Glass.

Height (mm)	Width (mm)	Pipe Centre (mm)	Number of Columns	Heat Output Delta T: 50°C
				(Btu/hr.)
500	800	870	11	3812
	1000	1070	14	4853
	1200	1270	17	5893
